## Control Valve Engineering Course 1300 (CEUs: 2.1)

This 3-day course reviews design and operating principles of control valves, actuators, positioners and related accessories. It describes the sizing and selection methods for a broad variety of control valves assemblies. Students will solve several demonstration sizing and selection problems using Fisher Specification Manager and published materials, plus participate in equipment demonstrations and hands-on workshops. Students who complete this course will:

- Select the proper valve characteristic for a given process
- Choose suitable styles of control valves for an application
- Size control valves and actuators
- Properly apply positioners and instruments

### Delivery Options

This training is also available as a remote virtual classroom course 1300V.

### Audience

This course is for engineers, technicians and others responsible for the selection, sizing, and application of control valves, actuators and control valve instrumentation.

### Prerequisites

Some experience with industrial controls equipment including control valves and actuators would be helpful.

### Topics Include

- Control Valve Selection: Rotary/Sliding Stem
- Actuator Selection and Sizing
- Liquid Valve Sizing
- Gas Valve Sizing
- Positioners and Transducers
- Valve Application Guidelines
- Valve Characteristics
- Valve Packing Considerations
